Impression with **Natural** Beauty

Look to Aplus Stationery and Promotion Line (asi/30228) for elegant bamboo promotions that take advantage of technology trends or for traditional gifts, such as writing instruments.

You'll find, for example, a functional bamboo iPad case that protects the tablet from damage and doubles as an easel for display on a desk or table. It's an eco-friendly gift that will delight recipients with good looks and practicality.

Aplus also offers iPhone cases that protect while presenting a professional, upscale image. Both case types can be laser-engraved with your company logo or message.

For a more traditional executive gift, consider a two-tone bamboo pen set including one ballpoint pen and one rollerball pen. This is an excellent incentive for salespeople, for executive contacts or as an employee recognition reward.

Not only does bamboo's quick rate of growth make it a sustainable material, but it produces 35% more oxygen per acre than a stand of trees. Amingo Shay, general manager for Aplus, explains further the value of using bamboo items: "Bamboo showcases laser-engraved logos to their best advantage, thanks to the natural beauty of the grain. And it is extremely hard and durable, making it a reliable material to keep your message in use for the long term."
