Methodology

The ASI Ad Impressions Study was first launched in 2006 by ASI’s research team to give our members powerful data that proves what we already knew – that advertising specialties are one of the most high-impact, cost-effective advertising mediums around.

Thousands of in-person and online interviews have been conducted with businesspeople and students in key cities across North America, Canada, Europe and Australia. These interviews have been used to gauge the reach of these products, consumer’s perceptions of promotional products, their influence on buying decisions and their influence on the perception of the advertiser.

Methodology: This report updates the prior years’ reports by expanding our interviews into two cities in Mexico (Monterrey and Mexico City) and several additional U.S. cities, which represent mid-major markets (Tampa, Charlotte, Minneapolis, Denver, San Diego). Respondents in all regions were asked questions about the promotional products they had received, including how many they had, how they used them, why they kept them and their perceptions about the advertisers that gave them the items.

Results from prior ASI Ad Impressions studies have been incorporated into this report so that additional metro areas, both in the United States and abroad, could be included in the analysis.
Section One

Product Popularity

For this section, respondents were asked to rate up to three promotional items they had received in the last 12 months. Promotional items were defined as items that include pens, T-shirts, mugs, calendars or any items that have a logo or message from an advertiser on them; they are usually given away for free to consumers in hopes of positively influencing their purchasing preferences or their attitudes toward the advertiser.

As the chart below reveals, writing instruments were most commonly cited, as more then one-half (56%) of promotional product recipients in the U.S. reported getting at least one in the prior 12 months, followed by shirts (48%) and bags (34%).
56% of U.S. consumers own logoed writing instruments.

Midwesterners have a lot to write about.

68% of consumers in the Midwest own a logoed pen, well above the U.S. average.

Tampa Consumers can’t keep their pens in their pockets.

On average, a logoed pen is used 3 to 4 times per day for its lifetime.

1/10th of a cent

Pens + Impressions = Best Value

The cost per impression is less than 1/10th of a cent in the United States.
Product Spotlight: Shirts

African American consumers are much more likely to keep their shirts because they are attractive, compared with other groups.

- 46% Black
- 40% Asian
- 36% Hispanic
- 33% White

Men are much more likely to own promotional shirts.

- 52% Men
- 46% Women

Branded shirts: swaying opinions, influencing people

- 57% of U.S. consumers feel more favorable about the advertiser who gave them a promotional shirt.

Germans wear them well.
On average, Germans report wearing their logoed shirts at least once a week.

Shirts in the Southeast score big.
Promotional shirts in the Southeast generate nearly 4,000 impressions.

Consumers know who gave them their promotional shirt, especially in the Midwest region.

**Product Spotlight: USB Drives**

In Madrid, USB drives are everywhere.

34% of Madrid residents own a promo USB drive, the highest of any area measured.

**Utility is Key**

In the U.S., 7% keep USB drives because they are attractive.

In the U.S., 91% keep USB drives because they are useful.

**Consumers in the Southeast are most likely to own a USB drive.**

- Southeast: 15%
- Southwest: 10%
- Midwest: 10%
- Pacific: 10%
- Northeast: 6%
- Western: 4%

**Men are more likely to own a branded USB drive.**

- Men: 13%
- Women: 7%

In the U.S., Asian consumers are the most likely to own a USB drive.

- Asian: 16%
- Black: 11%
- Hispanic: 10%
- White: 9%
Product Spotlight: Health & Safety Items

12% of U.S. consumers own logoed health and safety items.

Health and safety products drive positive opinions.

50% of U.S. consumers who receive a health and safety product state they have more favorable opinion of the advertiser after receiving it.

The Northeast doesn’t forget

84% of consumers in the Northeast remember the advertiser on the health and safety product.

Have health and safety product, will travel

27% of U.S. consumers who own a health and safety product report they carry it with them.

African Americans own the most health and safety products.

- 18% Black
- 13% Asian
- 12% Hispanic
- 10% White

20% of consumers in the Southeast own a promotional health and safety product, the highest of any region or country.
Men own more promotional outerwear than women.

Outerwear is Remembered
85% of U.S. consumers remember the advertiser who gave them the outerwear.

Outerwear Has Staying Power
On average, U.S. consumers report keeping outerwear for a year and a half.

Outerwear is kept for a variety of reasons.

Reasons for keeping promo outerwear:
- Useful: 75%
- Attractive: 52%
- Enjoyable to Have: 49%

It’s Not Political

They may not belong to a party, but they have logoed outerwear.

Midwesterners are prepared for the cold weather.

Ownership of logoed outerwear is highest in the Midwest, with 15% owning an item.
More than 90% of Canadians who own promotional outerwear, hats, drinkware and bags remember the advertiser.

- Writing Instruments: 48%
- Shirts: 36%
- Bags: 25%
- Calendars: 25%
- Caps/Headwear: 21%
- Desk/Office Accessories: 16%
- Outerwear: 16%
- Drinkware: 13%
- USB Drives/Flash Drives: 12%
- Health & Safety Products: 11%

82% of Canadians keep advertising specialties because they are useful, the highest percentage of any country.

Canadian consumers are the most likely to give items they don’t want to others.

In the North, we look out for each other.

More than 60% of Canadians who own promotional headwear think more favorably of the advertiser who gave it to them.

Close to my heart, and my head

Bags in Canada generate the most impressions.
Promo products in Europe have a long life.

Calendars, USB drives and outerwear are kept by European consumers for an average of eight months or longer.

More than four in 10 European consumers own a logoed writing instrument or shirt.

Nearly nine in 10 European consumers who own a promotional bag remember who gave it to them.

Reason for Keeping Products: Europe

To Europeans, the usefulness of a logoed product is the most important reason for keeping it.

75% Useful
32% Attractive
23% Enjoyable to Have
6% Point of Reference
For the first time, ASI interviewed businesspeople and students in two cities in Mexico: Monterrey and Mexico City. In each city, a total of 150 interviews were completed, for a total of 300 interviews.

**Apparel makes an impression in Mexico**

Hats: 2,882 impressions  
Shirts: 2,498 impressions  
Outerwear: 2,208 impressions

**¡Salud!**

Mexican consumers are nearly four times as likely to own promotional drinkware as our neighbors to the North. 50% of Mexican consumers own promotional drinkware.

| Drinkware  | 50% |
| Writing Instruments | 41% |
| Shirts  | 45% |
| Bags  | 38% |
| Headwear  | 38% |
| Calendars  | 33% |
| Desk Accessories  | 22% |
| USB Drives  | 11% |
| Health and Safety Products  | 11% |
| Outerwear  | 8% |

**To share or not to share, that is the question.**

In Mexico, consumers are more likely to throw away items they don’t want than give them away.

**Mexico Remembers**

Nearly 90% of Mexican consumers who own a promotional shirt remember the advertiser, among the highest percentages of any category in any country.

**¡Viva la Bags!**

Mexico wins! 38% of people in Mexico own a promotional bag.
52% of Aussies own a branded writing instrument.

34% of Australian residents adorn their desks with pen sets, logoed phone chargers, business card holders and the like.

Australians are the most likely to have a branded desk accessory.

Down under, bags get the most impressions.
The only location that has more impressions per bag than the U.S. is Sydney, with over 5,800 per logoed bag.

The Aussies Win!
Consumers in Sydney own more caps than those in any other country.

Nearly one-third of Australian consumers own a promo hat.

65% Give Away
18% File Away
18% Throw Away

Australians are very likely to give a promotional item they don’t want to someone else.
Spotlight on New Cities: Key Facts

Denver

- 90% of Denver consumers who own a promotional calendar refer to it twice a week or more.
- 84% of businesspeople in Denver remember the advertiser who gave them a logoed product.
- More than nine in 10 Denver residents report that they keep promotional products because they find them useful.

Charlotte

- Nearly two-thirds of Charlotte consumers report owning a promotional hat.
- 66% of Charlotte consumers who own a promotional calendar are more likely to do business with the advertiser.
- More than one-half of Charlotte consumers who own logoed drinkware keep it because it is attractive.

San Diego

- More than one-half of those who own a promotional bag report they keep it for 2 years or longer.
- Consumers in San Diego own the fewest promotional products of all cities measured in the U.S.
- San Diegans who own promotional drinkware keep it for over a year and a half, the longest of any U.S. City.

Tampa

- Tampa consumers who own promotional bags report using them more than once a week.
- Tampa residents own, on average, 12 promotional items, second only to Minneapolis.
- More than one-quarter of Tampa consumers report owning a promotional USB drive.

Minneapolis

- Consumers in Minneapolis own an average of 13 promotional products, the highest of any city measured.
- More than one-half of consumers in Minneapolis report owning a promotional hat, and they wear it about six times a month.
- Minneapolis residents were most likely to keep their logoed drinkware at their office.
Promotional Products Don’t Fade Away

Respondents were asked how long they keep a typical type of promotional item. Across all promotional products, the average was just over seven months. Some products such as calendars can stay around for about a year, while others, especially health and safety products and writing instruments, last for about six months. Calendars, which have the longest staying power, are the one item used most often for reference purposes, such as referring to a name or phone number.
Promo Products are Passed Along

Consumers who receive ad specialty products will typically give them to someone else when they are finished with them, thus furthering the advertiser’s reach. In the U.S. and Canada, nearly two-thirds of ad specialties that are not wanted are given away. In fact, in most countries, more than half of consumers report that they will give away a product that they are finished with rather than throw it out or file it away.

Usefulness is Key

Consumers want products that are, first and foremost, useful to them, especially when it comes to the more practical items such as writing instruments and USB drives. Here, usefulness outweighs attractiveness by at least five to one. However, that’s not to say that attractiveness isn’t important, especially if the item needs to be worn. For outerwear, attractiveness is a very close second to usefulness in reasons for keeping the product, with more than half of those who own outerwear reporting they keep it because it is attractive. If you want a customer to use the product for reference, then calendars are the way to go. Apparel items, whether they be shirts, outerwear or hats, are cited as the most enjoyable to have.

How Many Items Do People Own?

In the study, respondents were asked how many logoed items they currently had in their homes and/or offices. As indicated in the accompanying charts, people in the U.S. own an average of 9.8 promotional products. The number varies according to U.S. region, country, gender, race, age and political affiliation.

Among U.S. consumers, Asians own the most ad specialty products.

15% of Asian consumers report having 21 or more products.

Males aged 55+ own the greatest number of ad specialties.

Midwesterners own the most promotional products.

The market in Mexico is still developing.

©2014 Advertising Specialty Institute®. All Rights Reserved.
Section Two: Recipients’ Views on Advertisers

Recipients’ Views on Advertisers

Nearly six in seven (85%) recipients of promotional products could identify the advertisers on the promotional items they owned. This is significant since promotional products have such a long shelf life with the consumers who own them. Additionally, recipients not only remember the name of the advertiser, they also overwhelmingly feel more positive about the advertiser. This number is highest for recipients of outerwear, where nearly two-thirds have a more favorable rating of the advertiser. Promotional products get an advertiser remembered and drive positive opinions, but can they also drive future purchase intent? The answer is a resounding YES! Across all promotional products, more than one-third of recipients state they are more likely to do business with an advertiser after receiving the item than they were beforehand.

The world remembers. **85%** remember the advertiser worldwide.

Recall is highest for apparel items, as 88% recall the advertiser that gave them a shirt or hat.

If You Want to Sway Opinions, Give Outerwear.

Drive New Business in Addition to Favorable Opinions.

Nearly four in 10 consumers who received a product from an advertiser they had not done business with said they were more likely to do business with them in the future.
For this section, the average number of impressions each promotional product receives was calculated. The number of impressions a product makes was derived from multiplying how long a recipient has the product to how many people they come in contact with each month while using it.

In the U.S., bags continue to generate the most impressions (5,772) of any item measured in the study. This is because bags are used often in public places where they can be seen by many people. Other items that deliver a large number of impressions are writing instruments, hats, outerwear and shirts.

The accompanying charts illustrate the top five products, by country, that deliver the most impressions:

**The Most Impressions in the U.S.**

- Bags: 5,772 impressions
- Caps: 3,136 impressions
- Writing instruments: 2,805 impressions
- Outerwear: 2,650 impressions
- Shirts: 2,450 impressions

In the U.S., bags generate the most impressions by far.

**The Most Impressions in Canada**

- Bags: 4,724 impressions
- Caps: 3,634 impressions
- Writing instruments: 2,943 impressions
- Outerwear: 2,805 impressions
- Shirts: 2,253 impressions

In Canada, bags also generate the most impressions.

**The Most Impressions in Mexico**

- Apparel: 2,882 impressions
- Writing instruments: 2,498 impressions
- Outerwear: 2,208 impressions
- Bags: 1,630 impressions

Apparel generates the most impressions in Mexico.
While the exact ranking of impressions changes somewhat from location to location, the overall list of products generating the most impressions is consistent. Wearables consistently deliver a high number of impressions, and in the U.S., bags deliver the most impressions every year.

Items that create the fewest impressions tend to be those intended mostly for one person, such as health and safety items and USB drives. The value of these items is more in the connection they make with the user than the total number of impressions generated.

### The Most Impressions in London

- **November**
  - 5,125 Impressions
  - 4,066 Impressions
  - 3,449 Impressions
  - 1,852 Impressions

Though the incidence of owning promotional outerwear items is low, they generate the most impressions.

### The Most Impressions in Paris

- **November**
  - 3,473 Impressions
  - 2,665 Impressions
  - 2,372 Impressions
  - 1,700 Impressions

Similar to London, the incidence of owning promotional outerwear is low, but a high number of impressions are generated.

### The Most Impressions in Berlin

- **November**
  - 5,615 Impressions

In Berlin, writing instruments generate the most impressions by far.
Distributors should work with clients to determine the goals of their campaigns and the connection they want to establish with the intended recipient before selecting the right vehicle to deliver their message. Taking into account the number and quality of the impressions generated, in addition to some of the demographic considerations shown earlier in the report, gives the distributor the opportunity to serve as a consultant rather than an order taker.

The Most Impressions in Madrid

In Madrid, writing instruments generate the most impressions.

The Most Impressions in Rome

In Rome, writing instruments also generate the most impressions by far.

The Most Impressions in Sydney

In Sydney, bags generate the most impressions.
Ad Specialties are Cost-Effective

Advertising specialties remain less expensive per impression than most other forms of advertising.

The investment in ad specialties is modest, more targeted and allows for much greater levels of interaction with consumers than other forms of advertising.

As the chart on this page illustrates, promotional products have a lower cost-per-impression in the United States than prime-time television advertising, national magazine advertising and newspaper ads, and a similar CPI to radio and Internet advertising. Plus, while all of these other forms of advertising are often passive, advertising specialties allow for much more active interaction, such as storing valuable information on a USB drive or carrying groceries or other items around town in a promotional bag.

Also, consider that when consumers receive advertising specialties, they are often the exact market segment the advertiser is trying to reach. Banks aren’t simply mailing out pens to consumers of all ages from all areas, whether or not they have a branch there. Rather, they are giving out the pens only to current or prospective customers in the geographic areas that they serve. This targeted approach to advertising is much more difficult, if not impossible, to achieve in other forms of mass market advertising.

More good news: The cost for advertising specialties is not expected to increase markedly in the next few years, making them a more stable, reliable and innovative way for advertisers to reach consumers.

Even more good news: Consider that the cost of producing a 30-second radio or television commercial is often out of reach for all but the biggest advertisers. Many would have their entire advertising budget eaten up before they even aired the commercial more than a few times. This isn’t true with advertising specialties. Companies from the smallest local businesses to the largest Fortune 100 companies have access to the best that the advertising specialty business has to offer.
